My Internship With

IGNITE!

Alabama Data Scholars

Jazmine Smith
22 July 2025

THANK YOU!

QuantHub
Alabama Data Scholars
Kelsey Bickett
IGNITE! Team
Alexis Woody

Thank you all so much for the opportunity to get an insight and hands on experience to technology. Internships are rewarding and appreciated when your in college and dedicated to a field but not sure if its the job you wish to carry on for the rest of your life. This opportunity was prayed upon and will forever show my gratitude. Thank you again!

About Me

I am a current college student at Trenholm State Community College in Montgomery, AL. I take up Computer Information Systems and when I initially started going, I wanted to lean in more into data analytics. I am still towards that, however, designing has caught my attention as well. Things that interest me the most is organizing, traveling and learning off of others.

Project Overview

I used Excel and Google Docs to input information we needed to review or simply create task lists. I even made phone calls as an intern. I really liked designing the pictures to go on the website because it makes me feel like I am doing an important job. The photos wil be what stands out to the audience and it feels good to know that you contributed to the job or task.

Canva

I used Canva to create, upload, and design pictures.

Thrivecart

I used Thrivecart to post my designs and create sections for courses.

Salesforce

I used Salesforce to post my designs on the webpage.

ChatGPT

I used chatGPT for the first time. I learned howto talk to it as if it was a friend. I learned to be exact with question and how I want things done.

Looking Ahead

During my experience with IGNITE!, I found appreciation within CRM designs. So much thought process and critique and exact information is put into the design itself. My mentor, Alexis Brazzle, was so hands on and helpful with learning that it made my experience comfortable and open. Everytime I would think Ive messed up or Im not doing something correctly, she showed patience and told me “your just over-thinking it.” I have not talked about whats next with IGNITE! but I would be glad to come back as another internship with the team. Thank you Alexis again for pasing along your strategic skils, design eye, and professionalism.
